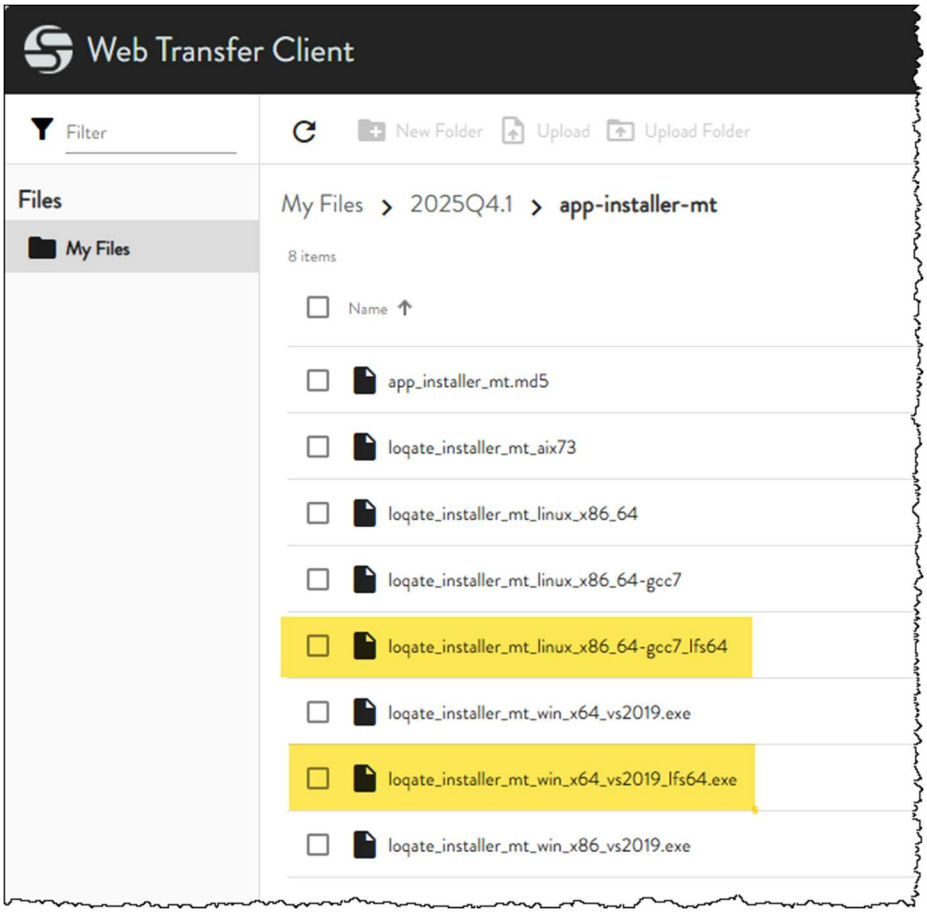
Important Release Note

Important note about India reference data

First, a little background. From the beginning, the powerful GBG Loqate Verify solution was designed with one format of reference data that is usable on both 32-bit and 64-bit operating systems. As you know, Loqate is constantly increasing country coverage by enhancing relationships with existing suppliers while, at the same time, finding new suppliers. Because of this continued country improvement process, starting with the 2026Q1.0 data release, India has now exceeded file size limitations of the 32-bit operating systems. This means that we needed to enhance the reference data format to support the increased size. We refer to this enhancement as lfs64 (where lfs means Loqate File System). Only a GBG Loqate Verify engine, that is lfs64 data format capable, can be used with this new India data.

On the download site, an engine that is lfs64 data format capable will have a 'lfs64' suffix on the download:



You can tell what version you're running by running lqtbatch with the -v option:

./lqtBatch.exe -v

LqtBatch: 2.57.1.19210-7f0f65d **LFS64**

Version Information: 2.57.1.19210-7f0f65d LFS64

Threading Model: Multi

'LFS64' will be listed when running the lfs64 data format capable engine.

You can continue to use the non-lfs64 data format engines. However, they will not benefit from the updated India data and will continue to download an India data version 'frozen' at the October 2025 release.

We will inform you via the release notes when the new LFS64 data format version of India is available to download.

Please feel free to reach out to your account manager or GBG Loqate support with any questions, comments, or concerns.

Country Rebuilds

Countries below have notable changes that go beyond just a normal refresh. Details are provided below.

Summary

Country	ISO2	Description
Türkiye	TR	- Removed Locality address element. - Changed neighbourhood address field from DependentLocality to DoubleDependentLocality.

Case Resolutions

There are 6 customer data case fixes that have been resolved in this release.

Summary

Country	Case Number	Remarks
Australia	CAS-159465-N7V9C2	Resolving a variant of locality Normanvillesa in the lexicon file
Great Britain	CAS-161219-Q8N2K0	Change 'PO Box' to the correct casing
New Zealand	CAS-161219-Q8N2K0	Change 'PO Box' to the correct casing
United States (Premium)	CAS-136672-K3Z6K1	Improvement to the reverse geocode result
Australia	CAS-161219-Q8N2K0	Change 'PO Box' and 'GPO Box' to the correct casing
Türkiye	CAS-164134-Y8Q7S6	Verify now returns Hanak as “SubAdministrativeArea”, instead of “Locality”

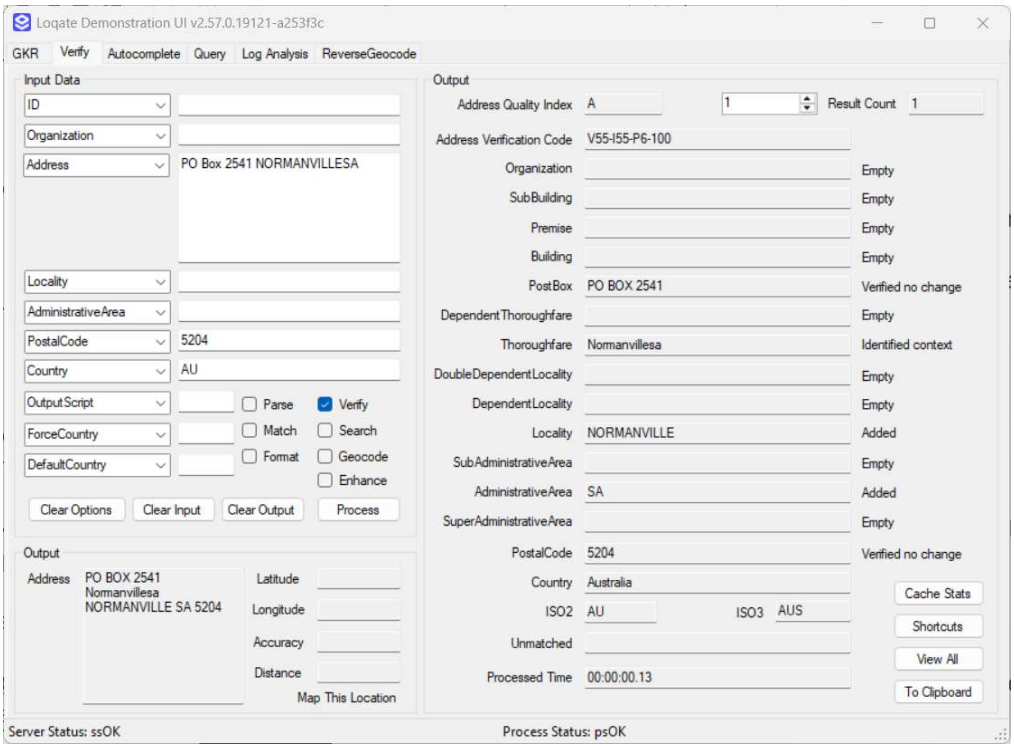
Details of Case Resolutions

Case Number: CAS-159465-N7V9C2 – Resolving a variant of locality Normanvillesa in the lexicon file

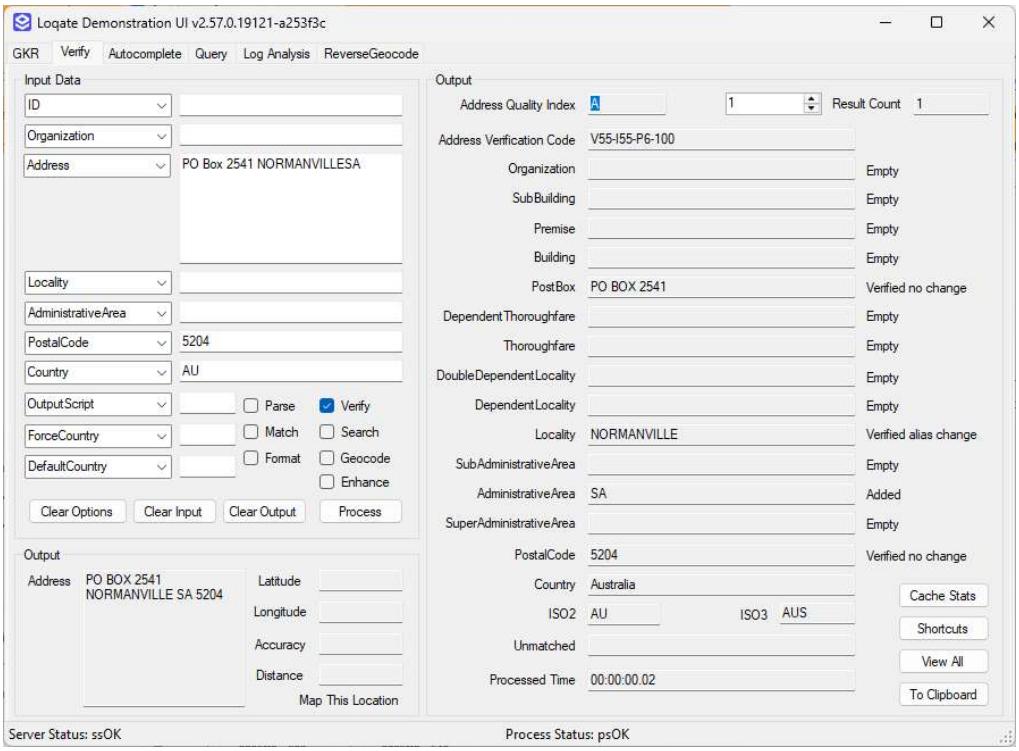
Input Address:

Address: PO Box 2541, Normanvillesa, South Australia, 5204, AU

Before



After

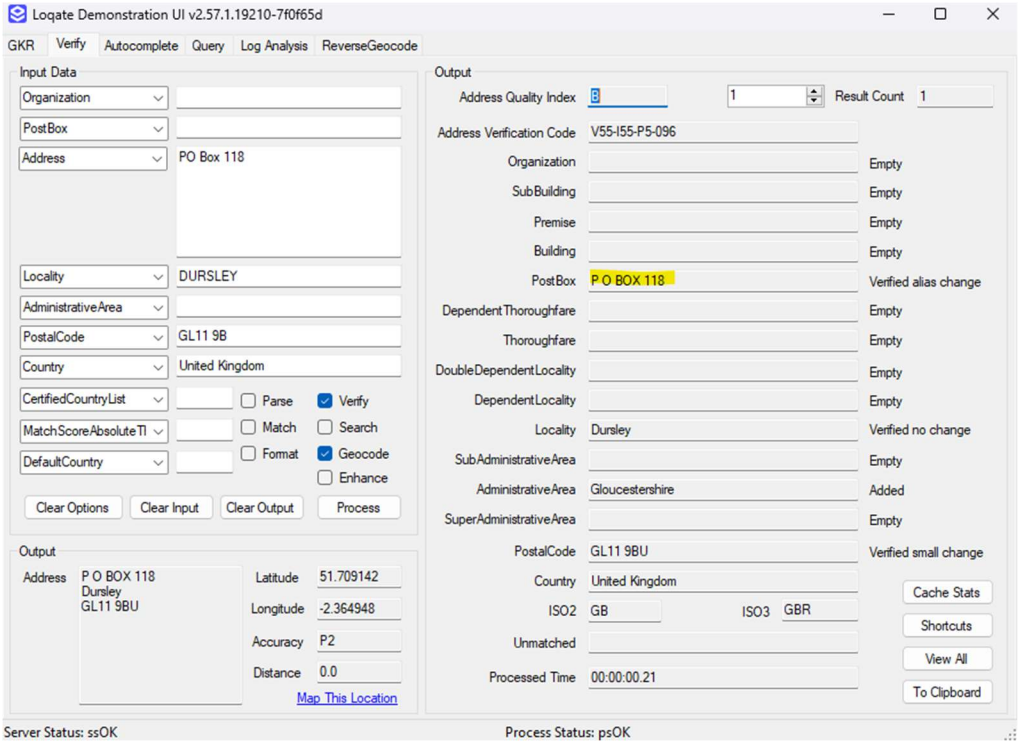


Case Number: CAS-161219-Q8N2K0 – Change 'PO Box' to the correct casing

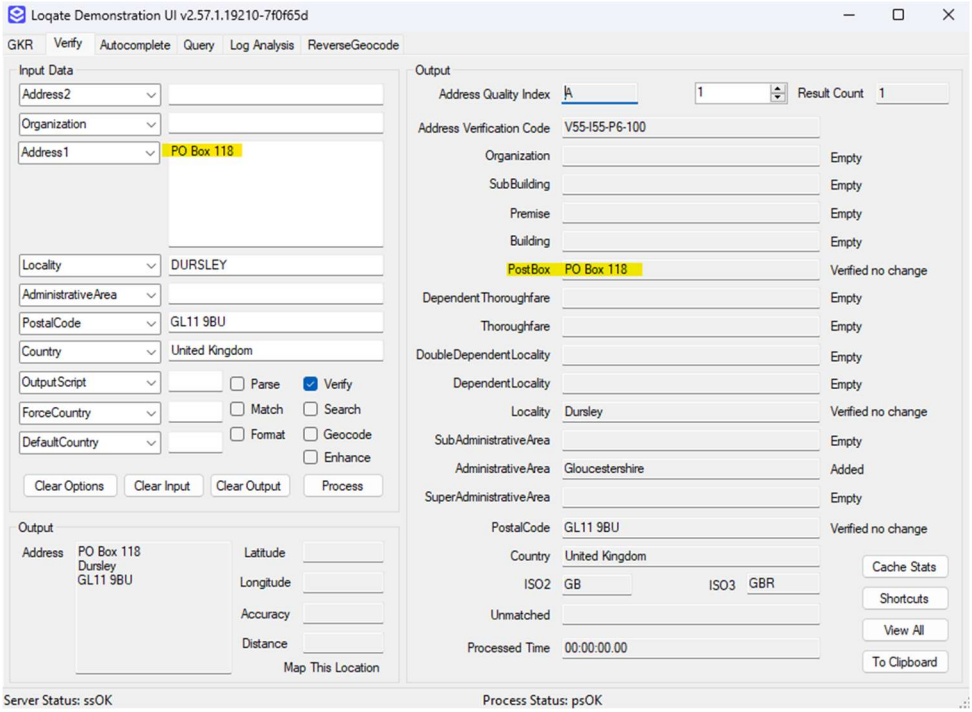
Input Address:

Address: PO Box 118
Locality: DURSLEY
PostalCode: GL11 9BU
Country: Great Britian

Before



After

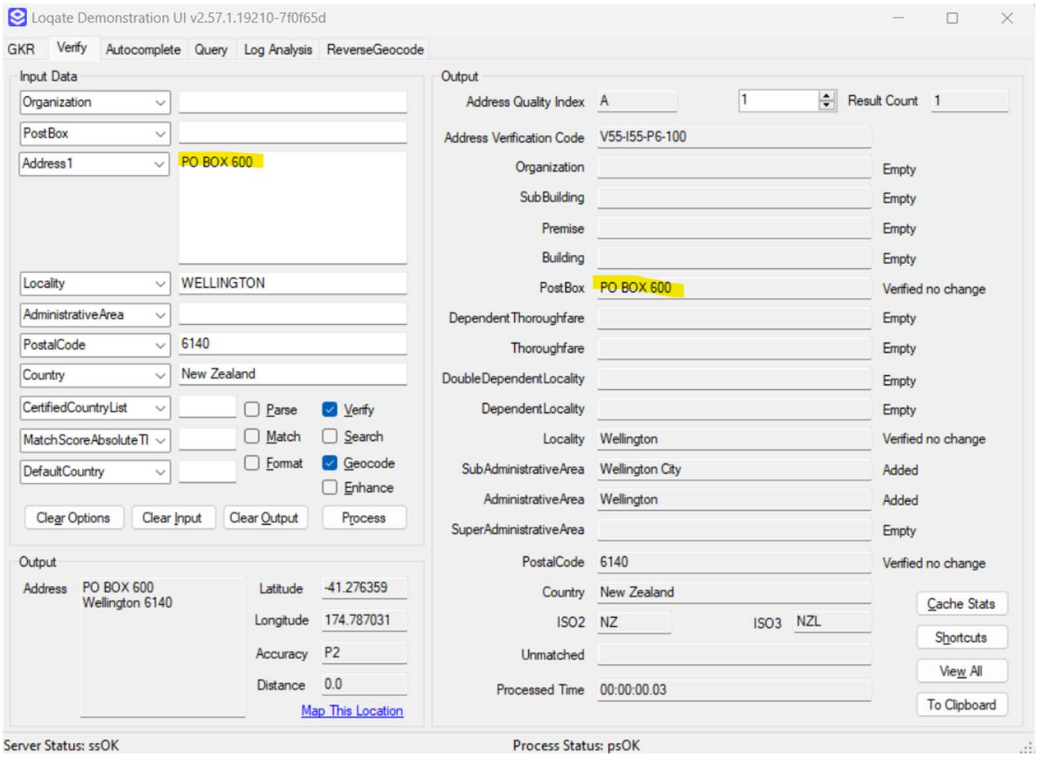


Case Number: CAS-161219-Q8N2K0 – Change 'PO Box' to the correct casing

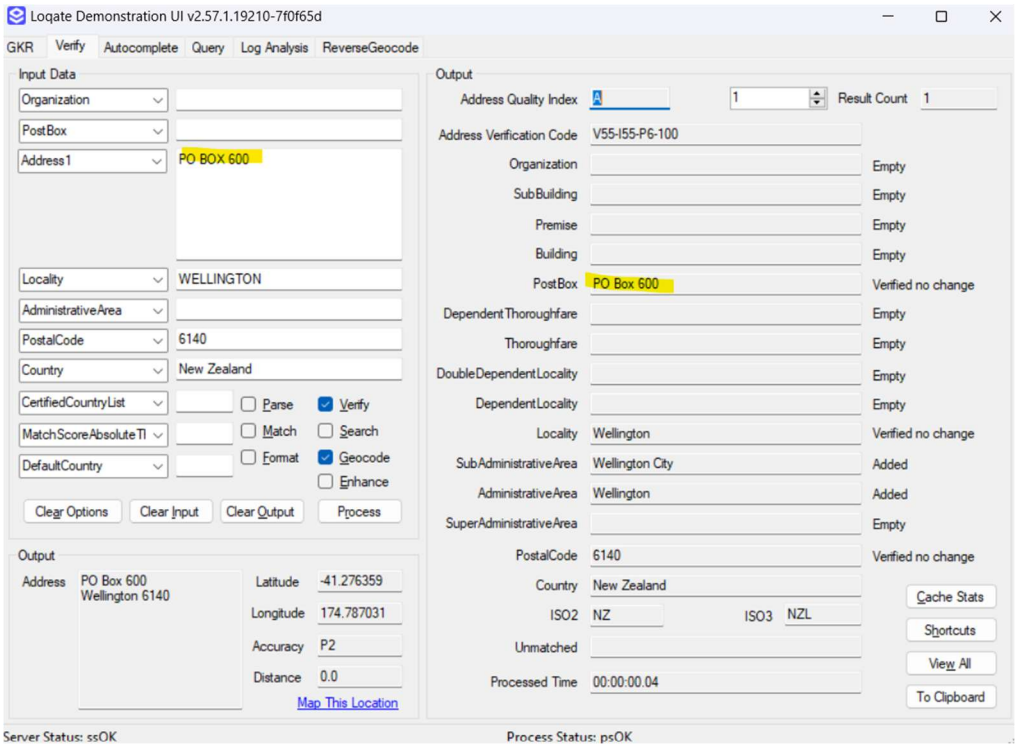
Input Address:

Address: PO BOX 600
Locality: WELLINGTON
PostalCode: 6140
Country: New Zealand

Before



After



Case Number: CAS-136672-K3Z6K1 – **Improvement to the reverse geocode result**

Input Address:

Latitude: 37.491400
Longitude: -122.228800
Country: US
