GBG Loqate

Details of Country Rebuilds/Major Improvements

Enhancements to Loqate's Address Verification SaaS Service

We have incorporated our Data Quality Services (DQS) for the United Kingdom into our existing SaaS address verification solution. This enhancement specifically benefits customers who verify Great Britain (GB) addresses, offering advanced features to support their business needs.

Additional Verification Capabilities

The integration allows customers to:

- Check whether their end customers have moved from the address provided
- Determine if the name associated with a particular address is deceased

Benefits for Customers

By implementing these additional checks, our customers can improve the accuracy and quality of their customer data and the enhanced verification capabilities help alert users to potentially fraudulent activity, ensuring greater security and reliability in customer interactions.

The service uses the Verify GB enhanced service and is the first Loqate API service to include PII customer data which is fully traceable in GBG audit logs to meet GDPR requirements.

Please reach out to your CSM or TAM for more information about this service and Api documentation is available here

Note: this service is not available for use in our on-premise / local install version of Verify.

Country Data Refreshes

Data for 29 countries has been updated with the latest available address data across 34 country files.

Country	ISO2	Remarks
Australia	AU	Country Refresh
