Important Release Note

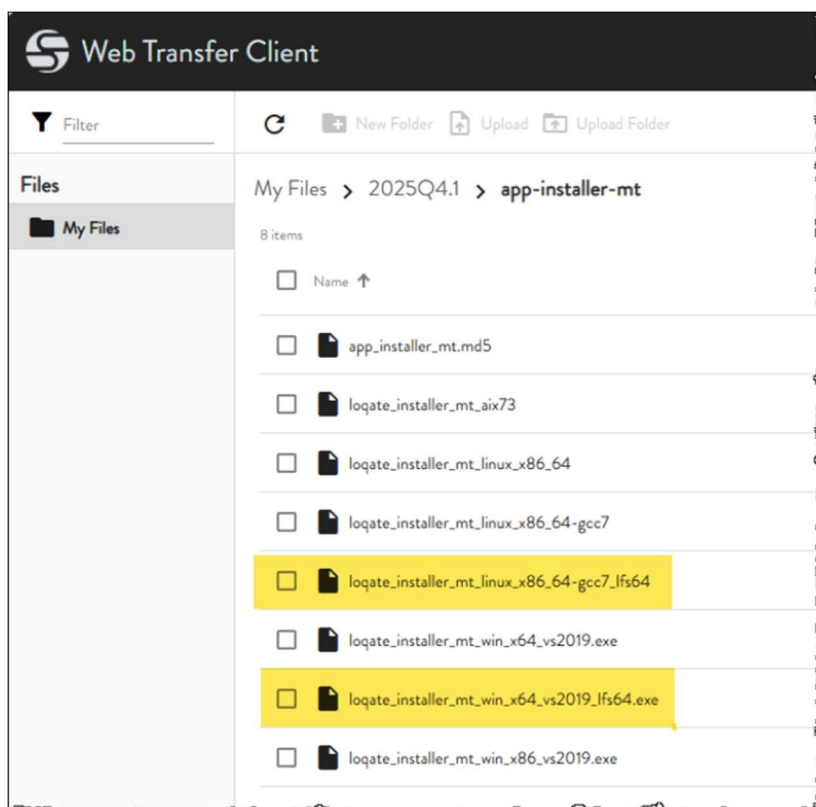

Update on India Address Data

As previously communicated in the 202601 release notes, India's Loqate reference data has exceeded the file size limit of **32-bit operating systems**. As a result we now will be releasing India reference data in **lfs64 (Loqate File System 64-bit)** format. This will be available in the next **data release in April**.

If you licence India data and you are already using the **lfs64 Verify** please contact your account manager to have your licence key enabled ready to download this new data from April.

If you are still using the **lfs32 version of the Verify Engine** and you need the latest India data you will need to upgrade to **lfs64 Verify**. Please contact your account manager to have your licence key enabled for lfs64 India data.

On our download site the lfs64 Verify versions have a 'lfs64' suffix.

If you want to check the version you are running please run **lqtbatch** with the -v option:

```
# ./lqtBatch.exe -v
```

LqtBatch: 2.57.1.19210-7f0f65d **LFS64**

Version Information: 2.57.1.19210-7f0f65d LFS64

Threading Model: Multi

'LFS64' will be listed when running the lfs64 data format capable engine.

Please feel free to reach out to your account manager or GBG Loqate support with any questions, comments, or concerns.

Country Rebuilds / Major Improvements

Countries below have notable changes that go beyond just a normal refresh. Details are provided below.

Summary

Country	ISO2	Description
Greece	GR	We have revised the locality field for Greece. Previously, the values in this field were referring to municipality. As part of our restructuring efforts, the field has now been updated so that its values correctly correspond to the intended “locality” level. Besides, Format Address is updated to exclude DependentLocality.

Details of Country Rebuilds / Major Improvements

Greece

Municipality was previously returned in the locality field; the correct locality value is now returned.
