Important Release Note

India's Loqate reference data has exceeded the file size limit of **32-bit operating systems**. As mentioned during the 202602 release notes, Loqate have released India reference data in **lfs64 (Loqate File System 64-bit)** format, rather than lfs32. This is now formal notice that this change is now live in the **202604 data release**.

To use the new India data, make sure you are running a **GBG Loqate Verify engine that supports the lfs64 format**.

If you are still using the **lfs32 version of the Verify Engine** and you need the latest India data you will need to upgrade to **lfs64 Verify**. Please contact your account manager to have your licence key enabled for lfs64 India data.

On the download site, an engine that is lfs64 data format capable will have a 'lfs64' suffix on the download:

You can tell what version you're running by running lqtbatch with the -v option:

```
# ./lqtBatch.exe -v
```

```
LqtBatch: 2.57.1.19210-7f0f65d LFS64
```

```
Version Information: 2.57.1.19210-7f0f65d LFS64
```

```
Threading Model: Multi
```

'LFS64' will be listed when running the lfs64 data format capable engine.

Please feel free to reach out to your account manager or GBG Loqate support with any questions, comments, or concerns.
