

Property Intelligence User Guide (Y26M08)

Property Intelligence User Guide (Y26M08)

GBG Loqate – Property Intelligence User Guide

- **Database version:** Y26M08
- **Document date:** 30th September 2026
- **Purpose:** Explains the structure, fields, coverage, accuracy, and release history of the **Property Intelligence** dataset used primarily for **insurance quoting and property risk assessment** in Great Britain.

Contents

- 1. Introduction 3
- 2. Database Fields 3
- 3. Data items 4
- 4. Technical details 6
- 5. Lookup tables 9
- 6. Accuracy 16
- 7. Coverage 17
- 8. Attribute distribution charts 19
- 9. Direct data content..... 21
- 10. Data recency 22
- 11. Attributions 24
- 12. Release notes 24

1. Introduction

This user guide provides information on the Property Intelligence database, prepared by GBG for customers looking to use the data. Property Intelligence is designed to assist in the process of providing insurance quotes for customers in England, Wales and Scotland by supplying data on residential properties. Property coverage:

- Houses, bungalows and flats covered although the majority of testing has been on freehold properties i.e. typically houses and bungalows;

Geographic coverage:

- England and Wales full coverage;
- Scotland full coverage but reduced accuracy because of different policies for land and property registration and the publication of data;
- Northern Ireland limited coverage, just includes estate agent data;
- Isle of Man and Channel Islands **not covered**;

Property Intelligence is currently built on a quarterly basis, this is subject to review. The underlying datasets have a range of update frequencies from monthly upwards. Updates are included in the build as they become available.

2. Database Fields

Utility fields

The database contains a set of utility fields and a set of feature fields. The utility fields are as follows:

- **UPRN** - the Unique Property Reference Number originating from the Ordnance Survey
- **UDPRN** - the Unique Delivery Point Reference Number originating from the Royal Mail
- **UMRRN** - the Unique Multiple Residence Reference Number originating from the Royal Mail
- **Address1** - a standardised first line of address containing house name or number and street
- **Postcode** - a full postcode
- **Easting** - Ordnance Survey National Grid Easting
- **Northing** - Ordnance Survey National Grid Northing
- **Latitude** - latitude in ETRS89 converted from the easting using OSTN02
- **Longitude** - longitude in ETRS89 converted from the northing using OSTN02
- **Output area code** - Census 2011 Output Area (OA) code from the ONS Postcode Directory
- **Lower super output area code** - Census 2011 Lower Super Output Area (LSOA) code from the ONS Postcode Directory

- **Output area code** - Census 2021 Output Area (OA) code from the ONS Postcode Directory
- **Lower super output area code** - Census 2021 Lower Super Output Area (LSOA) code from the ONS Postcode Directory
- **Country** - one of England, Northern Ireland, Scotland, or Wales from the ONS Postcode Directory

3. Data items

The feature fields in the database are arranged in sets of three:

- **X** - this is the data item of interest, for example a number of bedrooms for which X = “bedrooms”;
- **source_X** - this is the source of the information, for example the number 2 indicates that this data item is sourced from the Land Registry;
- **p_X** - this is a confidence score for the data ranging between 0 and 1. Confidence scores are calculated, where possible, as a “fraction correct” measure against a groundtruth dataset of 36,000 properties supplied by Simple and Open;

The unique key to the database is the UDPRN / UMRRN pair supplied by Royal Mail, the UPRN is also supplied. The list of data items is as follows:

- **Property type** - whether the property is semi-detached, detached, terraced or a flat
- **Number of floors** - the estimated number of floors in the property based on the height of the building.
- **Number of bedrooms** - the number of bedrooms in a property
- **Number of bathrooms** - the number of bathrooms in a property
- **Number of rooms in total** - the number of rooms excluding bathrooms and kitchens
- **Building construction period** - the construction date of a building in one of the following periods: (before 1719 (old), 1720-1839 (Georgian), 1840-1919 (Victorian/Edwardian), 1920-1945 (Inter-war), 1946-1979 (Post-war) and 1980 to date (Modern))
- **Year built** - the year built, only available for those buildings in the Land Registry Price Paid data, built after 1995
- **Listed building** - The grade of listing of a building, if it is listed, using data supplied by English Heritage, Cadw or Historic Scotland
- **Cadastral polygon area** - the area of the cadastral parcel in which the building sits expressed in square metres using data from Land Registry
- **Height** - the building height in metres
- **Building footprint (square metres)** - the approximate footprint of the building expressed in square metres

- **Building volume (cubic metres)** - the approximate volume of the building expressed in cubic metres
- **Average roof slope** - the average slope of the property roof, can be used to identify properties with flat roofs
- **Flat roof fraction** - the estimated fraction of a building which has a flat roof
- **Distance to tree** - distance from the nearest tree over 10 metres tall to the property geocode
- **Geocode multiplicity** - the number of property geocodes falling within the footprint of the building at 1.8 metres above ground level
- **Floor area (square metres)** - the liveable floor area in square metres
- **Last transaction price** - the price paid at the last transaction recorded by the Land Registry (England and Wales only, back to 1995)
- **Last transaction date** - the date of the last transaction recorded by the Land Registry (England and Wales only, back to 1995)
- **Last transaction duration type** - the duration type of the last transaction recorded by the Land Registry (England and Wales only, back to 1995)
- **Estimated current value** - estimated current value based on data from Land Registry (England and Wales only, back to 1995)
- **Number of transactions** - the number of transactions recorded by the Land Registry (England and Wales only, back to 1995)
- **Estimated council tax band** - estimated council tax from price at reference years using Land Registry data (England and Wales only, back to 1995)
- **Within 200 metres of watercourse** - flag indicating whether there is a watercourse within 200 metres
- **Distance to watercourse (within 200 metres)** - distance (in metres) to a watercourse, if it is within 200 metres
- **Distance to road** - the distance to the centre line of the nearest road from the property geocode, not necessarily accessible
- **Road class** - road class, as provided by Ordnance Survey
- **Business usage** - a flag indicating potential business usage
- **Planning classification** - planning classification as per Town and Country Planning (Use Classes) Order 1987 for non-domestic properties
- **Congestion zone** - a flag indicating if a property is in the London Congestion Zone
- **Burglary rate** - the number of burglaries per property per year averaged over a LSOA (England and Wales only)

- **Storey on which flat sits** - storey on which a flat sits. This typically contains N/A where it is not available or applicable or a number which may have been derived from a model based on the text found in the original data source
- **Is top floor flat?** - Is a flat on the top floor of the building
- **Number of extensions** - the number of extensions to a property, typically 1 but up to 4
- **Wall type** - the type of wall used in construction, possible values cavity wall, solid brick, sandstone, granite, timber frame, system built and SAP05
- **Main central heating fuel** - Main central heating fuel, possible values include gas, electricity, oil, coal, LPG, wood, B30K (a biofuel mix) and also 'not known' and 'none'
- **Type of tenure** - type of tenure: owner-occupier, rented or social housing
- **Energy rating** - Energy rating as indicated in the EPC Energy Certificate
- **EPC Inspection Date** - Inspection date indicated in the EPC Energy Certificate
- **Multi-residential property** - a flag to identify properties that are multi-residential

4. Technical details

Technical details for each of these fields are shown in the table below:

Title	Field name	Data type
UPRN	UPRN	Integer
UDPRN	UDPRN	Integer
UMRRN	UMRRN	Integer
Address1	address1	Text
Postcode	postcode	Text
Easting	easting	Float
Northing	northing	Float
Latitude	latitude	Float
Longitude	longitude	Float
Output area code	OA11CD	Text
Lower super output area code	LSOA11CD	Text

Title	Field name	Data type
Output area code	OA21CD	Text
Lower super output area code	LSOA21CD	Text
Country	country	Text
Property type	property_type	Lookup
Number of floors	floors	Text
Number of bedrooms	bedrooms	Text
Number of bathrooms	bathrooms	Text
Number of rooms in total	total_rooms	Text
Building construction period	age	Lookup
Year built	year_built	Text
Listed building	listed	Lookup
Cadastral polygon area	cadastral	Text
Height	height	Text
Building footprint (square metres)	footprint	Text
Building volume (cubic metres)	volume	Text
Average roof slope	avg_roof_slope	Text
Flat roof fraction	flat_roof_fraction	Text
Distance to tree	distance_to_tree	Text
Geocode multiplicity	geocode_multiplicity	Text
Floor area (square metres)	floor_area	Text
Last transaction price	last_transaction_price	Text
Last transaction date	last_transaction_date	Text
Last transaction duration type	last_transaction_duration_type	Lookup
Estimated current value	est_current_value	Text

Title	Field name	Data type
Number of transactions	n_transactions	Text
Estimated council tax band	est_council_tax	Lookup
Within 200 metres of watercourse	watercourse_200M	Lookup
Distance to watercourse (within 200 metres)	distance_to_water	Text
Distance to road	distance_to_road	Text
Road class	road_class	Lookup
Business usage	business_usage	Lookup
Planning classification	planning_classification	Lookup
Congestion zone	congestion_zone	Lookup
Burglary rate	burglary_rate	Text
Storey on which flat sits	flat_floor	Text
Is top floor flat?	top_floor_flat	Lookup
Number of extensions	extensions	Text
Wall type	wall_type	Lookup
Main central heating fuel	main_fuel	Lookup
Type of tenure	tenure	Lookup
Energy rating	energy_rating	Lookup
EPC Inspection Date	epc_inspection_date	Text
Multi-residential property	is_multires	Text

Table 1: Technical details for each utility and data field. Lookup fields contain positive integers (starting from zero). source_X fields are lookup fields, p_X fields are number fields.

5. Lookup tables

Tables 2-13 are the lookup tables relating the numbers found in the database fields to descriptions for the property type, property age, Council Tax band, and data source. The Yes/No lookup is used for the 'watercourse 200M', 'congestion zone' and 'top floor flat' fields.

Yes/no lookup

Description	Value
No	0
Yes	1

Table 2: Yes/no lookup

6. Accuracy

Accuracy for the tested fields calculated using 2026-02_groundtruth on 2026-03-12 16:34:55 against 32232 properties is shown in the table below.

Field	Accuracy (%)
Number of bedrooms	74.5
Number of bathrooms	77.4
Building construction period	68.8
Property type	85.6
Number of floors	89.9

Table 17: Summary accuracy for fields, measured against 'groundtruth' properties in England and Wales, excluding flats

7. Coverage

The following tables show dataset coverage and accuracy for number of floors, bedrooms, age and property type using the along with confidence for these attributes based on measurements against the 33,000 property groundtruth dataset covering England and Wales.

Source	Coverage	Accuracy	Confidence
DCLG	0.112	0.690	0.700
Default	0.032	0.406	0.500
Estate agent	0.488	0.850	0.850
Flats modeller	0.005	0.230	0.600
NB (bedrooms)	0.359	0.657	0.640
NROSH multipart	0.005	0.718	0.800
NROSH snapshot	0.000	1.000	0.800
Overall	1.000	0.745	0.746

Table 18: Accuracy and coverage for bedrooms

Source	Coverage	Accuracy	Confidence
Default	0.533	0.800	0.730
Estate agent	0.467	0.707	0.760
Overall	1.000	0.774	0.744

Table 19: Accuracy and coverage for bathrooms

Source	Coverage	Accuracy	Confidence
Cadw	0.000	0.636	0.630
DCLG	0.462	0.769	0.650
DCLG non-domestic	0.000	0.111	0.500
Default	0.009	0.510	0.470
Heuristic	0.012	0.414	0.600

Historic England	0.004	0.536	0.540
Land Registry	0.019	0.937	0.950
Naive Bayes (age)	0.292	0.713	0.721
Overall	1.000	0.688	0.638
VOA	0.200	0.468	0.473

Table 20: Accuracy and coverage for age

Source	Coverage	Accuracy	Confidence
Banded VOA	0.051	0.629	0.595
DCLG	0.064	0.889	0.900
Default	0.001	0.378	0.540
Estate agent	0.708	0.900	0.880
LIDAR	0.172	0.745	0.800
Land Registry	0.000	0.000	0.920
NROSH multipart	0.004	0.153	0.800
Overall	1.000	0.856	0.852

Table 21: Accuracy and coverage for property_type

Source	Coverage	Accuracy
Banded VOA	0.113	0.827
DCLG	0.110	0.949
Default	0.003	0.735
LIDAR	0.774	0.903
Overall	1.000	0.899

Table 22: Accuracy and coverage for floors

8. Attribute distribution charts

The following charts show the distribution of values for selected fields, for domestic properties, not arising from the default model

Figure 1: Distribution of property type

Figure 2: Distribution of number of bedrooms

Figure 3: Distribution of number of bathrooms

Figure 4: Distribution of building construction period

Figure 5: Distribution of number of floors

9. Direct data content

The following tables shows the coverage with direct data for the five fields tested against groundtruth.

Attribute	Percentage direct
Property type	88.6
Floors	74.9
Bedrooms	61.2
Bathrooms	39.2
Age	60.3

Table 23: Percentage of data supplied from direct sources rather than modelled

10. Data recency

Data recency for the Property Intelligence dataset is determined by a number of factors, listed below:

- The build process for Property Intelligence takes approximately 2 months from start to delivery to customer with quarterly scheduled releases;
- Individual datasets have a range of update frequencies, some are static and will never be updated, others are yearly, quarterly or monthly;
- Two datasets, EPC (formerly DCLG) and Estate agent data, have property-level fields which indicate when an inspection was carried out so potentially day-level data on recency could be provided;
- The LIDAR data is a composite dataset, 80% of which has been collected in the last 10 years;

The table below shows the dates of the datasets used in this version of Property Intelligence along with an indication of the expected update frequency.

Dataset	Frequency	Date
Congestion Zone	Once	None
DCLG	Quarterly	2026-05-13
DCLG Scotland	Quarterly	2025-05-14
ONS Postcode to LSOA/LA lookup	Quarterly	2026-09-23
Land Registry House Price Index	Monthly	2026-07-01
Land Registry Cadastral Polygons	Quarterly	2026-09-06
Land Registry Price Paid	Monthly	2026-08-28
English Heritage	Yearly	2026
Historic Environment Scotland	Yearly	2026
Cadw	Yearly	2026
NROSH	Once	2016-12-12
ONSPD	Quarterly	2026-09-01
ONS rural-urban classification	Once	2016-12-12
OS Open UPRN	Quarterly	2026-09-01
OS Open Rivers	Quarterly	2026-04-01
OS Open Roads	Quarterly	2026-04-01

Police.uk	Monthly	2026-07-01
Royal Mail	Monthly	2026-08-27
VOA	Yearly	2024
Estate Agent	Monthly	2026-09-02

Table 24: Data recency and frequency by dataset
 The Environment Agency started to systematically cover England for LIDAR measurement in about 2005 and they have added, very approximately 5% coverage in each year since then.

Figure 6: Cumulative percentage of LIDAR coverage

11. Attributions

This dataset contains Open Data typically provided under the UK government's [OGL3](#) license, a requirement of this license is that an attribution is provided for the data. These are as follows:

1. EPC: [Contains public sector information licensed under the Open Government Licence v3.0.](#)
2. EPC Scotland: [Contains public sector information licensed under the Open Government Licence v3.0.](#)
3. LIDAR - Environment Agency: [\(c\) Environment Agency copyright and/or database right \(2019\). All rights reserved.](#)
4. LIDAR - Scottish Government: [Crown copyright Scottish Government, SEPA and Scottish Water \(2012\)](#)
5. LIDAR - Lle: [Contains Natural Resources Wales information © Natural Resource Wales and Database Right. All rights Reserved](#)

12. Release notes

September 2026

No new fields have been added in this release but sources have been updated plus the accuracy of the Council Tax bandings for the records in England has been added/corrected on 1.5% of the records.

Sept 2024 to June 2026

No new fields have been added in these releases but sources have been updated

July 2024

A new field, IS_MULTIRES, has been added. It indicates if a property is multi-residential based on Royal Mail MRS.

June 2024

A new field, LAST_TRANSACTION_DURATION_TYPE, has been added. References to the duration type of the last transaction recorded by the Land Registry Price Paid dataset (England and Wales only, back to 1995). It has two possible values, Freehold or Leasehold.

July 2023 to March 2024

No new fields have been added in these releases but sources have been updated.

April 2023

An EPC_INSPECTION_DATE is added. References to 'DCLG', the original department responsible for the EPC Energy Certificate data are replaced with 'EPC' in documentation.

The Census 2021 codings oa21cd and lsoa21cd are added, to sit alongside the Census 2011 codings. Currently the source Open Data used to derive fields in Property Intelligence still use the Census 2011 codings.

January 2023

No new fields have been added in this release but sources have been updated.

October 2022

No new fields have been added in this release but sources have been updated.

July 2022

No new fields have been added in this release but sources have been updated.

April 2022

No new fields have been added in this release but sources have been updated.

Our supplier of business information which is used to populate the business_usage field has changed.

January 2022

No new fields have been added in this release but sources have been updated.

Floor areas for flats are now included in modelling so that values for neighbouring flats are used if direct data is not available.

As a result of changing our address cleanser to the standard GBG Loqate Verify engine we now include some data from Northern Ireland.

October 2021

No new fields have been added in this release but sources have been updated.

We have added the DCLG Scotland data which provides a significant improvement in accuracy for property type, and property age in Scotland as well as improvements in accuracy to numbers of bedrooms and floors. DCLG Scotland also provides fields including extension count, wall type, main fuel, floor area, total rooms, tenure and energy rating which were not previously populated for Scotland.

There are improvements in the flat floor modeller such that it does not return unreasonable large values (over 90 storeys) or non-numeric values (other than N/A), and floor areas for flats are now included in modelling so that values for neighbouring flats are used if direct data is not available.

As a result of changing our address cleanser to the standard GBG Loqate Verify engine we now include some data from Northern Ireland.

July 2021

No new fields have been added in this release but sources have been updated.

We have introduced modelling for 'flat_floor' - the storey a flat sits on which improves the coverage for this field, and introduces new entries to the data sources table.

April 2021

Tenure and energy rating fields have been added. Tenure is a replacement for the previously removed tenancy field. It indicates whether a property is owner-occupied, private rental or social housing. The name has been changed to retain consistency with the underlying dataset

The property age field has improved direct data content and accuracy as a result of the addition of a new dataset.

January 2021

No new fields have been added in this release but sources have been updated.

October 2020

We have resumed supply of two fields which had been suspended:

- the congestion zone field from the raw TFL data rather than using a third party as a supplier;
- the cadastral area (building plot area) which had been suspended due to licensing issues. This is based on the Land Registry INSPIRE Polygons data;

The Land Registry House Price Index is available once again, and thus Estimated Current Values will be up to date unless a sale went through during the period in which the HPI was suspended.

July 2020

As noted in the April 2020 Release notes we have removed the following fields from this release:

- geocode accuracy
- red route
- tenancy
- multiplicity
- outdoor area
- building count
- adult occupants

The Land Registry UK House Price Index has been suspended as of the April 2020 release, due to be published in June because of the impact of COVID-19 which means limited transactions are occurring on which to base the Index. The relevant Land Registry Bulletin describing this change is [here](#). This means the estimated current value field will contain the estimated current value at last release of the House Price Index - 1st March 2020.

April 2020

This build incorporates the OS AddressBase Premium property-level easting / northing and latitude/longitude coordinates, these replace those provided by our previous supplier. This data is supplied under evaluation terms which you have already signed up to.

These will be replaced with coordinates derived from Ordnance Survey Open Source data once this has been released in July 2020.

As a result of recent supplier changes we are also withdrawing a number of fields including the geocode accuracy and red route fields. The Congestion Zone field will remain but not be populated in the next build.

We will also be withdrawing the Tenancy field as a result of other supplier licensing changes.

Finally there are a number of fields which have not been populated for some time including multiplicity, outdoor area, building count and number of adult occupants. All of these fields are present in this build containing default values in most cases but will be removed from the July 2020 build.

January 2020

No new fields have been added in this release but sources have been updated.

October 2019

No new fields have been added in this release but sources have been updated.

July 2019

No new fields have been added in this release but sources have been updated.

April 2019

The listed building field now reports the grade of listing (I, II* or II in England or Wales, A, B or C in Scotland). Previously buildings were just reported listed/not listed.

October 2018

A tenancy field was added in this release which identifies a property as being rented, social housing or owner-occupier.

June 2018

No new fields have been added in this release but sources have been updated, in addition the documentation provides details of data recency.

February 2018

This release contains further parameters derived from LIDAR data, these include building footprint, building volume, the average roof slope, a flat roof fraction, the distance to the nearest tree over 10 metres high to the property geocode and a geocode multiplicity which counts the number of geocodes within a building. The building footprint is not listed below since it is not a new field but has been re-calculated using LIDAR data.

October 2017

This release incorporates a major new dataset which has brought improved accuracy to numbers of bedrooms, numbers of floors, property type and property age fields as well as introducing a number of new fields, listed below. The cadastral, outdoor area and footprint fields will be populated only with default values from this release onwards for licensing reasons. We hope to re-introduce the building footprint in the February 2018 release.

June 2017

This release sees a switch to using the Royal Mail PAF, Not Yet Built and Multiple Residence files as the base address list which results in approximately 10% more addresses than earlier releases. In addition accuracy in identifying flats was improved substantially, and a number of fields pertaining specifically to flats included

February 2017

This release introduced the following new fields, with a focus on logistics.

October 2016

This is the first public release of the Property Intelligence dataset
